

MK GLO-WAND DUAL WHITE/IR

RESCUE ID MARKERS

The MK Glo Wand Dual White/IR, 6" Total Length (NSN: 6260-01-575-9883) is a lightweight, durable, ecologically friendly, battery powered chem-light replacement tool. When you employ a Glo-Wand you immediately feel the difference. Due to its long-life battery, fewer are needed for mission. The MK Glo Wand Dual White/IR, 6" Total Length features a Constant ON White and Constant ON IR signal and is 6 inches in total length.

Unlike chem-sticks, the user decides when to turn the Glo-Wand Off. By replacing the chem-stick with reusable Glo-Wands this can add up to a significant cost savings at the end of the year. The Glo-Wand can be tied down thru the molded attachment points and is water resistant to 150 feet. Color end caps indicate LED color (Black for IR).

Whether you currently use chem-sticks to read maps, mark obstructions, pot-holes, turning points, vehicles, or personnel; the Glo-Wand is an excellent, reusable, economically sound, ecologically friendly, alternative.
